

Mobile App Developer

Step 7: Apply for Mobile Developer Jobs

CareerCompass — Detailed Learning Notes

What this step is about

Turn your mobile skills into evidence employers can evaluate.

Core Concepts

- A strong portfolio has two or three finished apps rather than many unfinished tutorial clones.
- For each project show the problem, features, architecture, technology, screenshots, repository and store/live link.
- Prepare for questions on language fundamentals, OOP, lifecycle, state, networking, storage, security and debugging.
- Practice explaining one technical challenge and one trade-off from every project.

Skills You Should Be Able To Demonstrate

- Finish two polished apps.
- Write concise project READMEs.
- Prepare a one-page resume.
- Practice explaining architecture in 60 seconds.
- Solve basic programming and data-structure problems.

Hands-on Project / Practice

- Create a portfolio with one native/cross-platform app and one API/Firebase app.
- Record a short demo and document the most difficult bug you solved.
