

Data_Analyst — Step 7

Apply for Data Analyst Roles

Detailed Learning Notes • CareerCompass

1. Learning Objective

Prepare for entry-level and junior data-analyst hiring through targeted applications, practical tests and interview practice.

2. Core Concepts — Detailed Breakdown

Technical preparation

Practice SQL joins/aggregations, Excel, pandas, visualization and basic statistics.

Case studies

Practice turning an ambiguous business question into metrics, queries, analysis and recommendations.

Dashboard discussion

Be ready to explain data modeling, chart selection, filters and validation.

Resume

Write bullets around actions and measurable outputs; list tools you can actually demonstrate.

Interview behavior

Prepare examples of handling ambiguity, mistakes, conflicting requirements and stakeholder communication.

3. Recommended Learning Workflow

- Practice SQL several times per week.
- Do timed Excel/pandas exercises.
- Complete one case study weekly.
- Practice presenting a dashboard.
- Tailor resume and applications.
- Track feedback and improve weak areas.

5. Hands-on Project / Practice

Create a mock interview pack: 20 SQL questions, 10 Excel questions, 10 statistics questions, 5 dashboard questions and two case studies. Record yourself answering the case studies and review clarity.

6. Common Mistakes & Pitfalls

- Only practicing syntax, not business reasoning.
- Memorizing SQL solutions.
- Ignoring communication.
- Using a portfolio that cannot be explained.

- Applying to roles without matching your demonstrated skills.

7. Completion Checklist

- I can solve common SQL tasks without copying.
- I can explain dashboard design decisions.
- I can interpret basic statistics.
- I can present a project clearly.
- My resume and portfolio agree with each other.

8. Interview / Assessment Questions

- Write a query for top customers by revenue.
- How would you investigate a sales drop?
- How do you validate a dashboard?
- What is the difference between a measure and dimension?
- Tell me about a time your analysis was wrong and how you fixed it.
